

Thank you for ordering from MonogramWedding.com

## *Printing Tips* .....

1. If you decided to use the watermark image be sure to remove the image from your document prior to printing. (For assistance with watermark download the *Add/Delete Background Image* PDF from our website under the tab Templates, How To Guides).
2. Be sure to check and adjust your printer settings. Setting options can be found under the properties or preference buttons located on the print screen.  
Recommended Adjustments:
  - Change print quality to *Best*
  - Switch paper type to *Cardstock* or *Heavyweight*
  - Check the default settings for paper size and if needed, create a custom size.  
Correct size settings:
  - Invite - 5" x 7"
  - Folded Card - 5" x 7"
  - Matte Invite - 4.5" x 6.5"
  - RSVP Postcard - 5" x 7.5"
  - Accommodation (larger) Card - 5.5" x 8.5"
3. Print a single test invitation to ensure that you are thrilled with your creation. To save project paper, cut plain printer paper to the proper size and feed it through first. Check your spacing and alignment and note which way you need to feed the stock paper into the printer.
4. To really nail it, we recommend that you feed the paper into the printer one at a time. We know that sounds tedious but it helps eliminate paper jams and alignment malfunctions.
